

CENTRAL ATRIUM VISUALIZATION

EXISTING ATRIUM

REWORKED ATRIUM

The Central Atrium area will be reworked to lessen the level changes. A new floor system will be installed that will provide a level floor throughout the atrium, with the exception of the small raised area near the center. Please note that the displays, furnishings and related accessories shown are not part of this project. These are included to provide a vision of how this expanded floor space may be used in the future.

CENTRAL ATRIUM IMPROVEMENTS
